Pregis

Protective film solutions **for virtually any surface**

Pregis PolyMask temporary protective films cover every major market and application requiring surface protection during stages of manufacture up through shipping and final assembly. The provided guides help easily identify our “Go To” products for the most common applications we face. However, this does not represent our entire portfolio of market solutions.

Our team of specialists are ready to assist you with more information or a consultation.

Your customers expect perfection

Customers expect a pristine product to be delivered every time. Pregis PolyMask temporary protective films guard your product's surface from scratches, abrasions and contamination during all stages of manufacturing and shipment. We have the experience to provide you the right protective film solution for virtually any application and help you deliver that perfection to your customer time and time again.

What are temporary protective films?

- Pressure-sensitive adhesive coated film (aka surface protection film, protective tape, protective masking)
- Protects during various stages of processing & environmental conditions
- Adheres to the surface, stays adhered and removes cleanly when the job is done
- Films can be applied to the surface by hand or through machine lamination

Pregis PolyMask protects at every step

Consider a refrigerator, and the delicate components that must be protected throughout each stage of manufacture and delivery.

Service Center

- Polishing
- Buffing
- Protecting

Manufacturing

- Bending
- Forming
- Embossing
- Punching

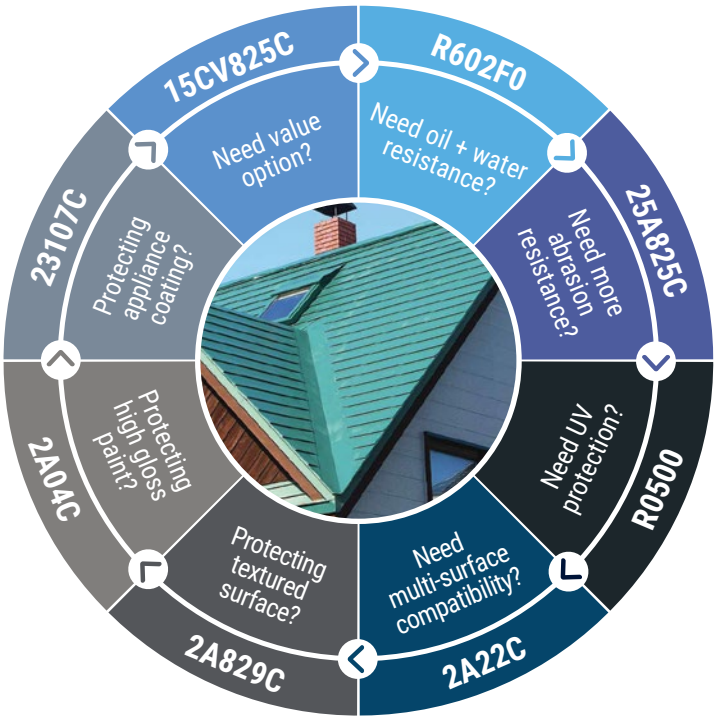

Shipping

- No scratching
- No Marring
- No damage

Delivery

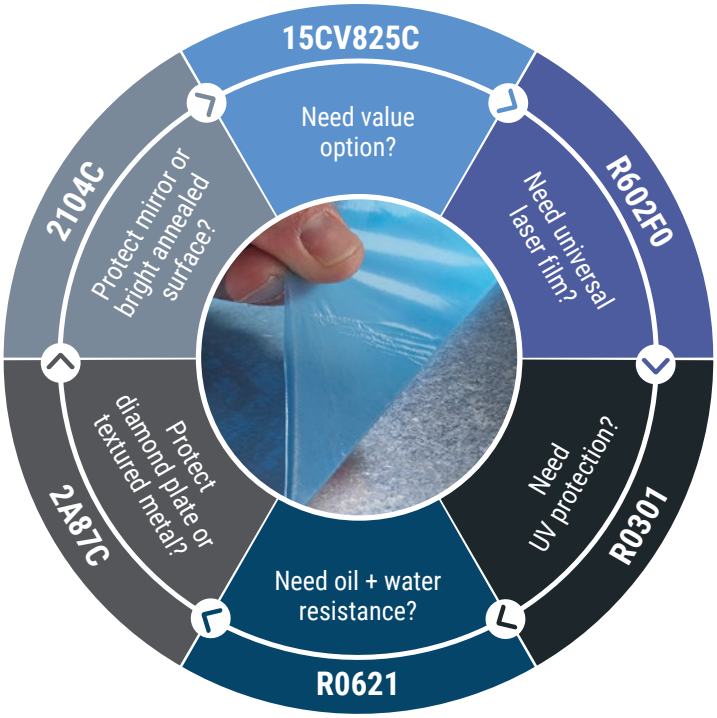

Happy customer receives goods in pristine condition

Coated Metals

Start with **2A825C**

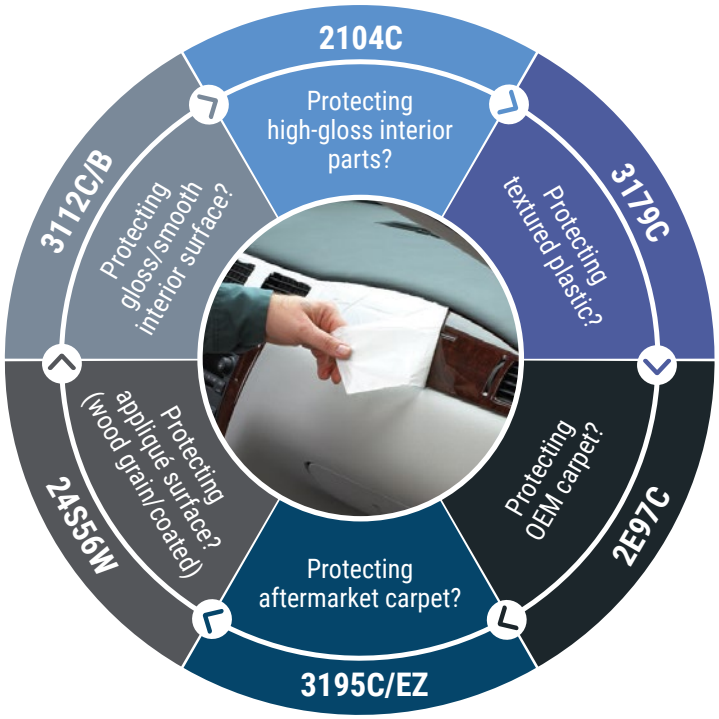

Example: metal roofing panels

Uncoated Metals

Start with **21825C**

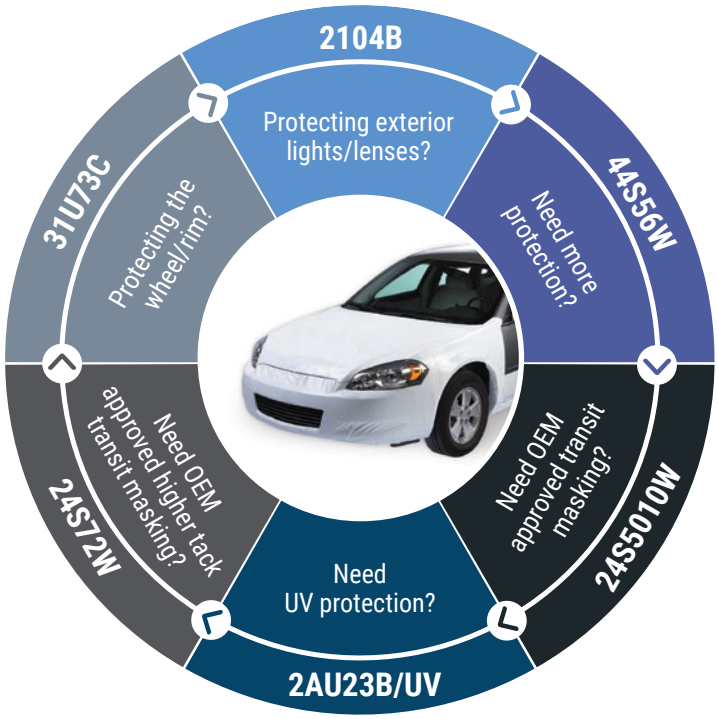

Example: Anodized Aluminum

Interior Automotive

What is your **Automotive Interior Application?**

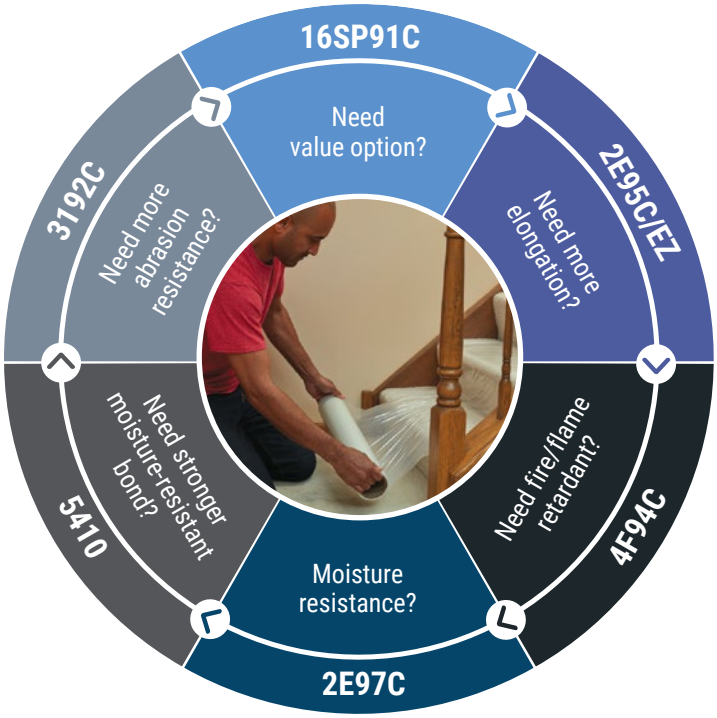

Example: High gloss interior parts
