Introducing the new GREX P635L CONTINUING A 20 YEAR LEGACY

The P635 wasn't just a tool; it was a revolution. Launched in 2004, it redefined the meaning of fine woodworking. With its unmatched level of features, precision and reliability, it quickly set itself apart as the "lexus of pinners" for the past two decades.

As we celebrate the 20th anniversary of the iconic P635, we're propelling into the future with the introduction of the enhanced P635L.

With new features like the auto-lockout with one-touch override and the on-board adjustable edge guide, the P635L is designed to make your work even more efficient.

We understand that investing in a tool is more than just a purchase; it's an investment in your craft, your passion, and your future. Get your own P635L and experience 20 years of innovation and craftsmanship with a tool that's built to last.

GREX 30 YRS OF INNOVATION & DEDICATION

When you choose a GREX tool, you're investing in a better built, longer lasting, more powerful tool with the best considered set of features and ergonomics. It's the same award-winning robust build quality that users have trusted in GREX tools for almost 30 years. And every new GREX tool adds innovations that enable you to do more, easier and faster.

At GREX, we don't just manufacture tools; we craft instruments of precision and durability that support the ambitions of those who use them. Your trust compels us to continually strive for excellence, seeking out new ways to innovate and enhance the tools we build.

UNMATCHED CUSTOMER SUPPORT

Alongside our outstanding tool features, we offer industry leading customer support. Your phone calls are still answered by a live person. When you reach out to us, you'll be connected with a knowledgeable GREX expert right here in the US.

To mark the 20th anniversary of the GREX P635, we're offering 20% off the P635L. It's a celebration of our shared journey and a thank you for making the P635 a staple in workshops around the world. Take advantage of this super sale. Get yours today.

At its core, the P635L is the original P635. It's the same reliable tool that woodworkers have known, loved and trusted for the past 20 years. Here's why it's stood the test of time and continues to set itself apart from any other tool.

PROVEN DURABILITY

This powerhouse of durability promises to become an enduring legacy in your workshop, serving generations to come. From its heavy-duty housing, to its extruded aluminum magazine and precision machined internal pistons and valves, every detail of the P635L exudes unmatched quality and resilience. It's how tools used to be made. Built to last.

PRECISION BUILT

Precision machined parts with tight tolerances are critical to driving 23 gauge pins reliably and consistently. The ribbed driver blade with matching nose piece and cover totally encapsulates the pin, allowing it to move only one way, straight into your work-piece.

The self-adjusting magazine saves time and guarantees accurate feeding and alignment of pins.

A LIFETIME OF USE

Purposefully created with serviceability in mind so you can get a life-time of use. While others constantly "update" their tools and discontinue availability of replacement parts, forcing you to buy new tools, we're committed to keeping our tools working for generations. The P635L uses the same core parts as the original P635. Whether you need to keep your P635 going or you're investing in an additional P635L, be assured that we'll have the parts you need to keep them working for years to come.

The new GREX P635L 23 Gauge Pinner THE BEST PINNER, MADE BETTER

Eventhough the P635 is the best pinner, we still made it better with enhancements in the P635L. Not only did we improve the design of internal parts so they'd last longer and minimize down-time, but we've made two major upgrades to make your work even more efficient.

Auto Lock-out with One-touch Override

With Auto-Lockout, the tool intelligently halts firing when you're down to about 7 pins, ensuring you're always aware of your pin count and avoids firing empty holes into your work-piece. Fire these remaining pins with a single press of the One-Touch Override button, allowing you to effortlessly resume your project without missing a beat.

Patent pending

On-board Edge Guide

The new precision edge guide allows woodworkers to shoot pins in a straight line without the need for finger-measuring techniques or pulling out your ruler to pre-mark a line. Quickly set the offset distance and be able to precisely fire pins even into the edge of very thin material. There's even an onboard holder to conveniently store the guide when not in use.

Patented

Built to last for generations
Proven 20 year design
All-metal construction

Ergonomics for all day comfort
Perfect balance, lightweight,
compact slim profile

Drive 9 different pin lengths
from 3/8" to 1 3/8"

Powerful motor
fully drives pins into
the hardest woods

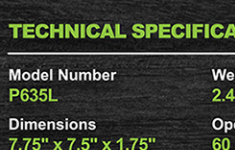

Double trigger safety
prevents accidental firing
allows firing from all angles

Cross-hairs guidelines
provide superior accuracy
of pin placement
